Horses	1% of bodyweight plus forage
Pet Rabbits	1% of bodyweight plus forage, chaff etc
Poultry and Pigs	Free choice without restriction

Controlled and gradual feeding of pellets is important to introduce animals to a change in their diet. Give special attention to introducing excessively hungry or drought-affected animals. Over the first 10 days, feed small controlled amounts of pellets, starting with 0.2% of bodyweight per day, and gradually increase the amount fed per day.

For Ruminants (Sheep, Goats, Cattle, Deer, Alpacas etc) and Horses, always ensure they have access to an adequate volume of an effective fibre forage source such as hay, straw, mature pasture, etc.

Ensure that clean fresh water is available at all times.
