

## LAMB CREEP CRUMBLE

### PRODUCT DESCRIPTION

RIVERINA LAMB CREEP CRUMBLE is a palatable, high protein and energy supplement with added vitamins and minerals for early weaning or creep feeding of lambs less than 15kg live weight.

During times of feed shortage lactating ewes can lose condition quickly when the lamb remains on the ewe. This leads to poor ewe condition and subsequent low conception rates. LAMB CREEP CRUMBLE is ideal for creep feeding of lambs on their mothers.

### TYPICAL COMPOSITION

- Barley, sorghum, wheat, maize, bran and pollard, canola meal, soybean meal, vegetable oil, limestone, salt, Bovatec®, sodium bicarbonate, Acid Buf, mould inhibitor, Mycosorb®, Yea-Sacc®, molasses, ammonium salts, bentonite, Riverina sheep vitamin & mineral premix
- Base raw materials may gradually change seasonally.

### DIRECTIONS FOR USE

- **CREEP FEEDING ON PASTURE:** Feed *ad lib* in a self – feeder while on the ewe in a creep feeding yard. Do not allow ewe access to the feeder. Lambs will receive enough roughage while grazing with the ewe.
- **EARLY WEANING IN YARDS:** Lambs under 15kg
- Week 1: Offer 25 – 50g/head/day in troughs
- Feeding rates can be 50g/head/day when the lambs are leaving the troughs empty.
- Keep feeding this product until the lambs reach between 15 – 18kg.
- Remove stale feed from the troughs daily.
- Good quality leafy hay must be available at all times e.g. oaten, barley or irrigated Rhodes grass hay.
- Feed should be available at all times.
- Lambs should always have access to cool, clean, fresh water.
- Water troughs should be cleaned a minimum of once a day to improve feed intakes.
- When lambs reach 18kg change to LAMB FEEDLOT PELLETS.
- Contact your local Riverina representative for more advice on early weaning lambs.

### NUTRITIONAL ANALYSIS

### FEATURES

- High amount of good quality protein, for muscle development in young lambs.
- Yea-Sacc® added for faster adaptation to dietary changes and improved rumen efficiency with faster live weight gain.
- Acid Buf used to help reduce acidosis risk and as an excellent source of bio-available minerals.

### QUALITY PRODUCT

- Manufactured to strict quality control standards for incoming raw materials and the finished product.
- Formulated in accordance with current research into sheep nutrition.

### MEDICATION

This feed contains Bovatec® which supplies lasalocid sodium at 33mg/kg for improved feed conversion efficiency and weight gain.

### WITHHOLDING PERIOD:

Nil.

### WARNING

**Do not feed to dogs, horses or other equines as it may prove fatal.**

**Do not use in lactating ewes where milk or milk products may be used for human consumption.**

**Feed as directed.**

### STORAGE

Cool, shaded, dry conditions away from vermin.

### EXPIRY DATE

Six months from the date of manufacture.

### PACK SIZE

20kg woven polypropylene bags.

Bulk: Please contact your Riverina Sales Representative.
